

DMBS Project Database

Foreign Key - italicized

Primary Key - bolded

Comments - green

Relations - blue

Weak - red

Inventory

- Ingredients (**ingredient_id**, name, *allergen_id*, min_stock, unit, quantity) List of all the available ingredients
- Suppliers (**sup_id**, name, contact, delivery_time, is_active) List of all the suppliers
- Supplies (*sup_id*, *ingredient_id*) List of what ingredient each supplier supplies (Many-Many Relation between Ingredients-Suppliers)
- Inventory_orders (**inventory_order_id**, *sup_id*, *ingredient_id*, purchase_date, expiry_date, quantity, unit, cost, status) List of all the orders made
- Logs (**log_id**, *ingredient_id*, timestamp, quantity, action) List of all the updates to the inventory

Menu

- Items (**item_id**, name, description, price, prep_time, *category_id*, is_available) List of all the menu items
- Category (**category_id**, name) List of all the menu categories
- Recipes (*item_id*, *ingredient_id*, quantity, unit) List of all the ingredients required for each menu item (Many-Many Relation between Items-Ingredients)
- Allergens (**allergen_id**, name, description) List of all the allergens
- Nutritional_info (*item_id*, calories, protein, carbs, fat, fiber, sodium) List of all the nutritional info of the menu items

Sales

- Customers (**customer_id**, *user_id*, name, contact, visit_frequency) List of all the customers

- Menu_orders (**menu_order_id**, *customer_id*, order_time, price, discount) List of all the orders made
- Menu_orders_items (*menu_order_id*, *item_id*, quantity, status) List of all the items ordered by the customer (Many-Many Relation between Menu_orders-Items)
- Gift_code (**gift_code_id**, code, amount, type, min_order, valid_from, valid_to) List of all the available gift code and discounts

Waste Tracking

- Waste (**waste_id**, category, description) List of all the waste categories
- Waste_records (*waste_id*, *ingredient_id*, *item_id*, quantity, *menu_order_id*, timestamp) List of all the wastage (Many-Many Relation between Waste-Ingredients)

User Management

- Roles (**role_id**, name, description) List of all the roles
- Employees (**employee_id**, *role_id*, hire_date, salary) List of all the employees
- Users (**user_id**, username, email, password_hash, *role_id*, last_login) List of all the users
- Permissions (**permission_id**, name, description) List of all the permissions
- Permissions_granted (*permission_id*, *role_id*) list of all the permissions granted for each role (Many-Many Relation between Roles-Permissions)

Demand Forecasting

- Occasions (**occasion_id**, name, description) List of all the occasions
- Sales_history (**history_id**, *item_id*, quantity, *occasion_id*) List of all the sales history
- Weather_data (**date**, temp, humidity) List of all the weather data

Sustainability

- Sustainability_records (**sustainability_record_id**, date, *menu_order_id*, carbon_footprint) List of all the sustainability measures
- Compliance_records (**compliance_record_id**, inspection_date, status, description) List of all the sustainability inspections

Notification Alerts

- Alerts (**alert_id**, message) List of all the alert types

- **Alerted** (*alert_id*, *user_id*, created_at) List of all the alerts sent to the specific users
(Many-Many Relation between Alerts-Users)
-
